

MICRO SS-30

Portion Perfect, Rain or Shine.

The Micro SS30 Stainless-Steel Portion Scale is a high-precision weighing solution designed for demanding environments. Its rugged stainless-steel construction and waterproof design ensure it performs reliably in kitchens, bakeries, butcheries, and industrial production lines where hygiene and durability are essential.

With a capacity of up to 30 kg and readability down to 1 gram, the Micro SS30 delivers accurate and consistent results every time. Its Hi/Lo/OK check-weighing function and audible alarms help operators maintain portion control and reduce product waste efficiently.

Built entirely from stainless steel, the Micro SS30 is resistant to corrosion and ideal for wash-down environments. The waterproof load cell, sealed keypad, and IP68 rating ensure the scale continues to operate flawlessly even in wet and demanding conditions.

Whether for food production, packaging, portion control, or quality assurance, the Micro SS30 provides reliable, professional-grade results. Its combination of precision, durability, and ease of use makes it the perfect choice for commercial kitchens, factories, markets, and laboratories alike.

This scale features dual bright red LED displays for easy viewing from multiple angles and is powered by a long-lasting rechargeable battery with AC adapter support. Its fast stabilization, zero-tracking, and external calibration make it suitable for both stationary and mobile weighing setups.
