

ADAM LBX SERIES

Portable Accuracy Built for Real-World Performance

The Adam LBX Compact Bench Scale is engineered to provide fast, accurate results for everyday commercial weighing. Built with a durable ABS housing and a hygienic stainless-steel pan, the LBX delivers reliable performance in food production areas, workshops, packaging stations, and mobile work environments. Its compact footprint ensures easy placement on countertops or benches without sacrificing functionality.

Featuring a bright backlit LCD display with large 24 mm digits, operators can clearly read results even in low-light conditions. The LBX incorporates essential functions such as Tare, Zero, Hold, Check-Weighing, and Parts Counting, making it a versatile tool for businesses that rely on consistency and speed. Rapid stabilization ensures that weights are captured almost instantly, reducing waiting time during busy operations.

The LBX shines in quality-control environments thanks to its LED indicators and audible alarms for under, over, or within preset weight limits. These real-time signals help maintain accuracy during portioning, packaging, or batching tasks. Whether ensuring exact food portions or verifying product compliance, the LBX supports precise decision-making on the spot.

One of the LBX's standout features is its long-life rechargeable battery, offering up to 240 hours of operation on a single charge. Combined with 5V USB charging, the scale can be powered from a standard adaptor, power bank, or even a vehicle USB port. This flexibility makes the LBX perfect for market vendors, mobile food services, and locations where access to power is limited.

Every detail of the Adam LBX is designed to enhance durability and ease of use. The sealed keypad protects against dirt and spills, while overload protection helps extend the scale's lifespan in high-demand environments. With external calibration capability, operators can ensure ongoing accuracy whenever needed. Reliable, compact, and efficient, the Adam LBX is a smart investment for any business that values precision and productivity.
