

CALIBRATION WEIGHT SETS

The Foundation of Trust in Weighing

Precision is at the heart of every reliable measurement, and calibration weights are the unseen foundation that ensures accuracy. Our Precision Calibration Weight Sets (OIML Class E to M) are certified tools that safeguard the integrity of your data, whether in a high-resolution laboratory or a busy industrial workspace.

From milligrams to kilograms, our individual weights and full sets cover every calibration need. Loose weights start as small as 1 mg, while heavy-duty cast iron and steel weights reach up to 1000 kg, giving you the flexibility to calibrate any scale with confidence.

All weights are classified according to internationally recognized OIML standards. E1 and E2 classes are ideal for ultra-precise laboratory balances, F1 and F2 for analytical and precision balances, and M1 for daily checks on industrial and commercial scales. This ensures your weights match the precision of your equipment every time.

Our sets come in durable cases or aluminium boxes for safe storage and transport. Each set includes tweezers for careful handling, preventing contamination from skin oils or dirt and maintaining certified accuracy over years of use.

Investing in certified calibration weights equips your team with the essential tools to maintain compliance, quality assurance, and confidence in every measurement. From laboratory analysis to industrial verification, these weights ensure consistent accuracy, efficiency, and peace of mind in every operation.

In the weighing industry, accuracy isn't a luxury—it's the standard. Calibration weights are more than just standardized metal; they are the fundamental link between an international system of measurement and your daily operations. By utilizing OIML-certified weights, you are not merely adjusting a scale; you are establishing a verified chain of trust in your products, compliance records, and data integrity. Invest in the certified precision of our calibration weights and secure the foundation of reliability that defines professional, accurate, and compliant measurement worldwide.

Border Scales cc
Physical Address:
Cnr Courtenay & Keats Street,
Cambridge, East London, 5247

Tel No.: 043 - 726 2801

Our Services

Border Scales is accredited by SANAS and NRCS to perform Legal Metrology Verification of scales used in trade within our scope of 3kg to 3000kg. Our trained and skilled technicians will service, calibrate and repair all equipment we sell. We offer in-house training on all new equipment installations.
