

Precision Weighing Meets Power and Efficiency with Micro T7E

The Micro T7E Platform Scale redefines industrial weighing by combining accuracy, speed, and smart functionality. Built for demanding environments such as warehouses, farms, workshops, and factories, it's designed to handle everyday operations with ease. From monitoring production batches to weighing bulk goods, this durable platform scale ensures stable, precise readings — every time.

With its large 50mm red LED display, the T7E offers excellent visibility from a distance, even in dim lighting. Its intuitive keypad layout simplifies operation, while dual power options — mains and rechargeable battery — provide uninterrupted performance, even in areas without consistent electricity. This makes it ideal for both stationary and mobile weighing applications.

Engineered for practical performance, the Micro T7E features a tough industrial platform available in sizes from 300 × 300mm to 600 × 800mm and capacities from 30kg to 500kg. The robust construction withstands heavy use, while built-in features such as HI/LO alarms, accumulation, and animal mode deliver precision, consistency, and versatility across diverse weighing tasks.

RS-232 output is standard for enabling direct connection to printers or PCs for easy record-keeping and traceability. Whether you're weighing livestock, verifying shipments, or managing production output, the T7E keeps processes smooth and efficient.

Measure your success instantly: The Micro T7E is the durable backbone your business needs for precise inventory, shipping, and quality control

Rugged, reliable, and ready for any challenge, the Micro T7E Platform Scale goes beyond simple weighing. It enhances workflow efficiency, supports industrial-grade accuracy, and adapts to a wide range of applications — making it a trusted partner in any professional weighing environment.

Border Scales cc
Physical Address:
Cnr Courtenay & Keats Street,
Cambridge, East London, 5247

Tel No.: 043 - 726 2801

Our Services
Border Scales is accredited by SANAS and NRCS to perform Legal Metrology Verification of scales used in trade within our scope of 3kg to 3000kg.
Our trained and skilled technicians will service, calibrate and repair all equipment we sell.
We offer in-house training on all new equipment installations.
