

## Livestock Scale LS4- Wi-Fi

The LS4 Wi-Fi Livestock Scale transforms herd management with superior accuracy and wireless connectivity. Designed for farmers and feedlots, it delivers stable, accurate weights instantly, even with lively animals.

The digital stabilizing filter technology (4 modes) eliminates movement spikes, guaranteeing a reliable weight—the foundation of effective monitoring.

Achieve non-negotiable accuracy across all stock. The LS4 features a high capacity of 2000kg×1kg for large cattle. Crucially, its Fine Mode offers exceptional precision for smaller animals, measuring up to 300kg×0.1kg.

The LS4's greatest asset is its connectivity. It links to your Android phone via a free app, which becomes your complete digital record-keeper.

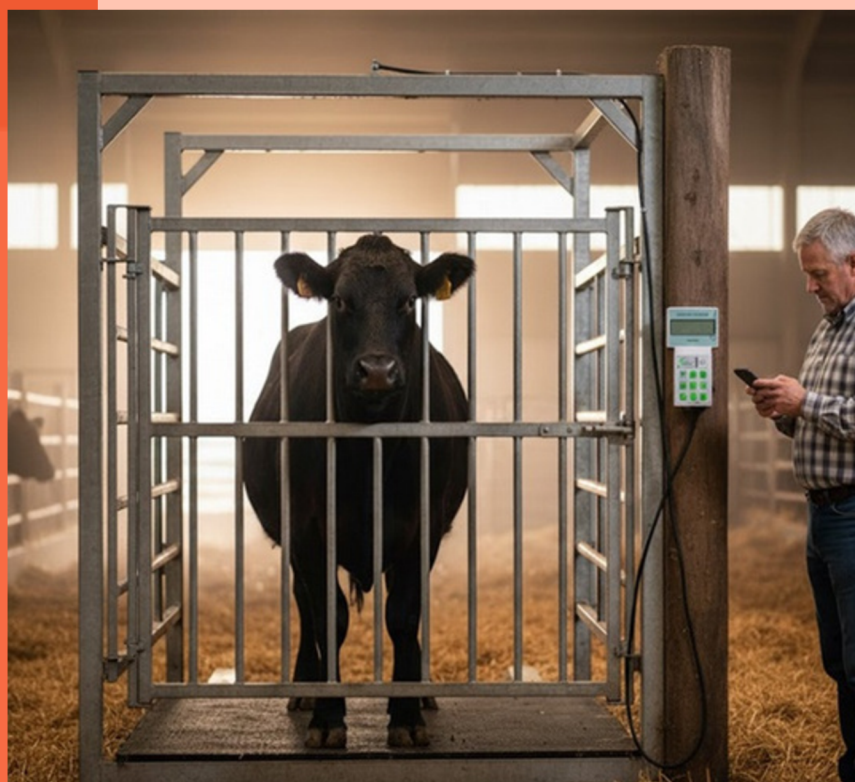

The app automatically stores all weighing data (ID, weight, time, etc.) and uses customizable fields (Breed, Medicine) to ensure quick, standardized documentation. Eliminate the clipboard and capture clean, organized digital records effortlessly.

The system seamlessly integrates with an Android app, moving you beyond manual recording into true, data-driven management. It is the essential modern tool for optimizing animal health and market value.

The LS4 is rugged, portable, and versatile. Its built-in rechargeable battery and choice of load beams (600mm to 1000mm) make it ideal for remote pasture weighing. It includes 12V and 220V chargers for flexible power.
