WE'RE **WEIGH** BETTER

Confidence on Display – The Micro ZSP Pole Price Computing Scale

The Micro ZSP Pole Price Computing Scale is engineered for precision that directly protects your profits. Featuring a maximum capacity of 30kg and a crucial Dual Range Divisions, it offers ultra-fine accuracy of 5g for smaller, high-value items (0-15kg) and reliable 10g accuracy for bulk produce (15-30kg). This level of verified precision, combined with essential functions like Pre-Set Tare (to deduct packaging weight), ensures every transaction is fair, accurate, and profitable.

In business, trust and legality are non-negotiable. The Micro ZSP Pole Scale is fully NRCS Approved (SA1596), guaranteeing that your weighing process meets all regulatory standards. Furthermore, the prominent pole display is a game-changer for customer relations. It clearly shows the Weight, Unit Price, and Total to both the operator and the customer, eliminating disputes, speeding up checkout, and building instant, lasting consumer confidence.

Say goodbye to being tethered to a wall socket. The Micro ZSP is designed for versatility and mobility, whether you operate a high-traffic deli or run a mobile market stall. It runs on both a standard AC Adaptor and a powerful Rechargeable Battery, offering hours of continuous operation. Combined with its durable construction—an ABS body and an easy-to-clean Stainless-Steel Top Pan (204 x 263mm)—it is the perfect resilient solution for any indoor or outdoor selling environment.

Time is money, and the Micro ZSP is built to save you both. The scale features advanced memory capabilities with 4 Direct PLUs and 99 Indirect PLUs, allowing you to instantly recall prices for your fastest-moving inventory with a single touch. This dramatically minimizes manual data entry, reduces human error, and keeps your customer queues moving quickly, allowing your staff to focus on service rather than complex calculations.

Investing in the Micro ZSP Pole Scale is investing in the future of your retail business. It's more than just a scale; it's a compliant, portable, and transparent business tool. From its 14mm LCD Display with white LED Backlight to its robust, hygienic construction, every feature is designed to maximize efficiency and customer trust. Make the smart choice today and equip your business with the trusted, accurate technology that profitable modern trade demands.
