WE'RE **WEIGH** BETTER

Trade with Confidence, Anywhere, Anytime – Micro ZTP Price Computing Scale

In today's fast-paced retail environment, every second and every gram counts. The Micro ZTP Bench Price Computing Scale is engineered to solve your biggest efficiency challenges. Designed for high-volume retail operations, including deli's, markets, and grocery stores, this scale eliminates the guesswork and manual errors that slow down your checkout process. By combining swift price computing with rock-solid accuracy, the Micro ZTP ensures your staff can process transactions quickly and correctly, keeping customer lines moving and minimizing wasted time.

The Micro ZTP features exceptional dual-range precision, offering accuracy exactly where you need it. It measures lighter items (up to 15kg) with a fine 5g readability and heavier bulk items (up to 30kg) with 10g readability. This intelligent design ensures you are always charging the correct price, maximizing your margins and preventing profit loss due to inaccurate weighing. Furthermore, its massive memory capacity of 103 Product Look-Up (PLU) keys—4 direct and 99 indirect—means pricing for all your key products is available instantly, streamlining inventory management and sales.

Retail counters are tough environments, and your equipment needs to withstand constant use. The Micro ZTP is constructed with a durable ABS plastic housing and topped with an easy-to-clean, high-grade stainless-steel pan. This robust combination ensures the scale can handle daily wear and tear while maintaining the strict hygiene standards required for food service. Cleaning is simple and quick, guaranteeing your scale remains professional and compliant, day in and day out.

Don't let a power outlet—or a power outage—dictate where and when you can sell. The Micro ZTP is designed for total operational freedom, featuring a reliable, built-in rechargeable battery in addition to AC adaptor power. Whether you are running a busy market stall, moving the scale between departments, or facing an unexpected power cut, the Micro ZTP keeps working, ensuring uninterrupted sales and maximizing your earning potential regardless of the location or circumstances.

Customer trust is your most valuable asset. The Micro ZTP helps you earn it with every transaction using its highly visible display system. Equipped with three backlit 14mm LCD displays, front and rear, both the operator and the customer can simultaneously view the weight, unit price, and total price. This full transparency removes any doubt about pricing accuracy, enhancing the customer experience, reducing disputes, and cementing your reputation as a fair and trustworthy business. Choose the Micro ZTP and invest in speed, precision, and customer loyalty.
