

# Micro A12 Chair Scale

## Weighing Without Limits

The Micro A12 Chair Scale offers precise and reliable weight measurements for patients who cannot stand. Its high-capacity design of 300 kg and readability of 0.1 kg ensures accurate monitoring for frail, elderly, or mobility-impaired patients. The chair design allows for safe, sit-down weighing, giving patients comfort and peace of mind.

Built for durability, the Micro A12 features robust construction that withstands frequent use in clinics, hospitals, and dialysis units. Its adjustable armrests and footrests enhance patient comfort, while sturdy wheels and a handle make moving the scale between rooms effortless.

The bright 20 mm red LED display provides instant readability, even in dim lighting. Practical functions like hold, tare, and zero ensure consistent and accurate results, even when patients shift slightly. These features make the Micro A12 ideal for high-traffic medical settings.

With a built-in rechargeable battery and mains power capability, the Micro A12 offers flexible operation anywhere in your facility. Its lightweight, mobile design allows staff to quickly relocate the scale as needed, improving workflow efficiency while maintaining patient safety.

The Micro A12 meets rigorous quality standards. Backed by Border Scales' service and calibration support, this chair scale is a dependable investment in patient care, accuracy, and operational efficiency for any medical facility.
