

Micro CS5/10T Crane Scale

In industrial environments, inaccurate weight measurements aren't just inconvenient—they can cost you safety, compliance, and profit. The Micro CS5/10T Digital Crane Scale delivers precise, certified weighing for loads up to 10 tonnes, giving your team the confidence to operate safely and efficiently.

The CS5/10T is engineered for harsh industrial environments. Its die-cast aluminium casing protects sensitive components from knocks and bumps, while the large, bright Red LED display ensures clear visibility even in dusty or dimly lit conditions.

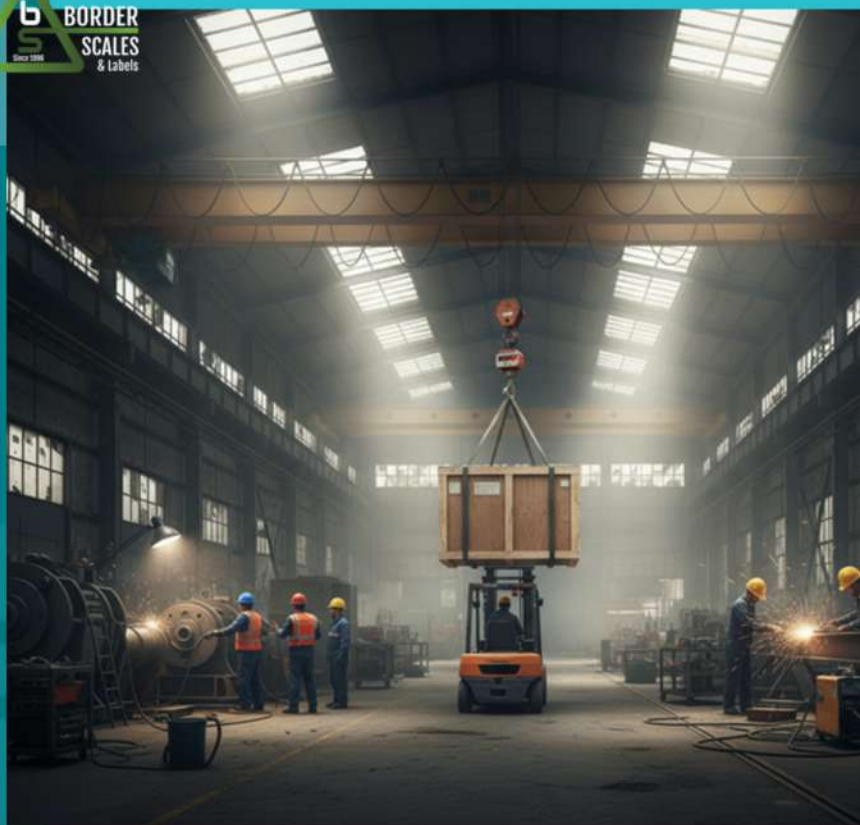

Safety is built into every function. The infra-red remote control allows operators to power the scale, zero it, and tare loads from up to 10 meters away, keeping personnel clear of suspended heavy materials while maintaining control and precision.

The CS5/10T includes accumulation and hold functions to streamline inventory checks and weight tracking. Multiple piece weights can be summed, and readings can be locked on display until safely recorded, saving time while reducing errors.

Designed for continuous industrial use, the scale is powered by a rechargeable battery and comes with an AC/DC charger for minimal downtime. With the Micro CS5/10T, your team gets high-capacity accuracy, rugged durability, and operational flexibility for every heavy-lift task
