

Micro NHB Series: Best Value Lab Balance

The Micro NHB Series is the best value top pan balance for laboratories, manufacturing, and pharmacies, offering high precision and reliability without the high cost. It is a robust unit featuring load cell technology and versatile, fast weighing capabilities.

The series is highly versatile, equipped with functions like Percentage Weighing, Parts Counting, and Accumulation. High-precision models (NHB150/NHB600) include a windshield for stability, catering to diverse weighing applications.

Built for efficiency, the balance includes durable ABS housing, an easy-to-clean stainless-steel pan, and a clear LCD display. Crucially, the built-in rechargeable battery provides up to 40 hours of continuous use, ensuring portability and uninterrupted operation with the included AC/DC adapter

A key benefit is seamless data integrity via the standard RS232 interface. This connectivity allows direct data transfer, eliminating manual transcription errors and ensuring superior data quality for regulated environments.

Your Best Investment in Accuracy

The NHB Series' portability (up to 40 hours on battery) and robust functions make it ideal for the Pharmaceutical Industry, Research Laboratories, and specialty applications like gemology, delivering essential precision and durability.

Three models are available: the high-precision NHB150 (150g×0.001g), the versatile NHB600 (600g×0.01g), and the high-capacity NHB6000 (6000g×0.1g), addressing various lab needs.
