

# MICRO RLS-1100

## YOUR RETAIL COUNTER'S NEW BEST FRIEND

### **MEET THE MICRO RLS-1100— YOUR RETAIL GAME-CHANGER**

Take your counter operations to the next level with the MICRO RLS-1100. This all-in-one scale combines precise weighing, fast label printing, and pricing calculations in a compact, intuitive unit. Ideal for butcheries, deli's, greengrocers, supermarkets, and start-up retailers, it's designed to make your daily operations faster, smarter, and more accurate.

NRCS-approved for Legal Metrology in South Africa, the RLS-1100 ensures every transaction is precise and compliant. With dual-range capacities of 30 kg and readability of 5g / 10g, your customers get exact weights while you maintain confidence in pricing and regulatory compliance.

Print professional labels in seconds with the RLS-1100's thermal printing system. It handles barcodes, product names, prices, and regulatory information on variable-length labels from 30 mm to 80 mm wide, and side-loading makes changing rolls simple and quick. Your labels are always clear, readable, and compliant, keeping your store running smoothly. Fast, efficient service depends on easy access to your products. The RLS-1100 supports hotkeys and PLU entries, enabling staff to recall frequently sold items instantly, making managing your product range a breeze. Store hundreds of items for instant access, speed up customer transactions, and reduce staff effort—so your team can focus on providing excellent service instead of repetitive setup tasks.

Retail environments move fast, and the side-loading label mechanism ensures your staff can replace rolls in seconds. This reduces wait times at checkout and keeps your counters running smoothly during peak trading hours. Featuring a dual-line backlit LCD, this scale shows both numeric and alphanumeric data. Staff can easily navigate product names, codes, and weights, while customers see clear, accurate prices at a glance. It reduces confusion and enhances transparency at the point of sale.

The scale is powered by a universal AC 100–240V, 50/60 Hz supply, making it suitable for a wide range of retail environments. Built for reliability, it ensures consistent performance while being energy-efficient— helping you cut costs without cutting corners.

The pole-mounted display is standard for higher visibility. Design is robust and space-efficient, allowing the RLS-1100 to slot seamlessly into your store without sacrificing functionality.

## SPECIFICATIONS
