

The Adam CKT Cruiser Bench Checkweighing Scale is a durable, high-precision tool designed for fast and reliable weighing in industrial, laboratory, and commercial environments. Its accuracy and strength make it ideal for maintaining product consistency and preventing costly errors.

A standout feature is the Intelligent Checkweighing system, which speeds up repetitive tasks. The display changes colour—green for “Within,” yellow for “Under,” and red for “Over”—paired with an audible alarm to give instant feedback and reduce mistakes during sorting and packaging.

Weight only Portion Scale – Adam CKT

The CKT is built to handle tough conditions with its heavy-duty ABS housing and large Grade 304 stainless steel pan. A sealed keypad protects sensitive electronics from spills, dust, and dirt, helping reduce downtime in demanding workplaces.

For counting and inventory tasks, the scale offers high internal resolution and an advanced parts counting mode. Its optimisation feature continually improves piece-weight accuracy, while preset tare makes repeated weighing quicker and easier.

The scale is also highly flexible, operating on mains power or its long-lasting rechargeable battery, which provides up to 70 hours of use. An RS-232 interface allows easy connection to printers or computers, ensuring efficient data capture and smooth workflow integration.
