

## Engineered for Industry The Micro A12E Stainless Steel Platform Scale

When cleanliness and accuracy are non-negotiable, the Micro A12E Stainless-Steel Platform Scale is the perfect choice. Crafted entirely from stainless-steel, this durable platform scale is built to perform in industries where moisture, hygiene, and reliability are critical — from food processing and pharmaceuticals to chemical and marine applications.

Engineered for heavy-duty use, the A12E features a fully stainless-steel frame and indicator that stand up to wash down environments and harsh conditions. Its sealed, IP-rated design shields internal components from water, dust, and corrosion — ensuring lasting performance and consistent weighing accuracy.

Equipped with the trusted Micro A12E indicator, the scale delivers clear visibility through a bright red LED display, with zero and tare functions for seamless operation. The dual power system — AC mains and rechargeable battery — ensures uninterrupted use, whether on the factory floor or in a mobile setting. Connectivity is built-in too, with RS-232 output for data transfer or printer integration.

## Specifications

- **Construction:** Fully stainless-steel housing and indicator with IP65 stainless-steel enclosure for corrosion resistance and easy cleaning
- **Water Resistance:** Water-resistant design protecting load cells and circuitry for damp or wash-down environments
- **Display:** Bright red LED display with approx. 20 mm high digits for clear visibility
- **Power Supply:** AC mains supply with integral rechargeable battery for continuous operation
- **Functions:** Tare, Zero, Accumulation, Simple counting, Hold
- **Interface:** RS-232 serial output for printer or PC connectivity
- **Load Cell Protection:** Environmentally protected for long operational life

## Platform Size & Capacities

300 × 300 mm: 30kg × 1g (Non-trade use)

300 × 400 mm: 30kg × 10g | 60kg × 20g | 150kg × 50g

400 × 500 mm: 300kg × 100g

500 × 600 mm: 150kg × 50g | 300kg × 100g

From food production lines to marine docks, the Micro A12E stainless-steel Platform Scale offers the perfect blend of strength, hygiene, and precision. Built to last and designed to perform, it's the dependable solution for environments where both cleanliness and accuracy matter most.
