

When industrial weighing demands clear visibility, versatility, and robust control, the Micro T7E Indicator stands out as a smart, dependable solution.

The Micro T7E Indicator is suitable for:

- Industrial and production facilities – monitoring loads and managing quality control
- Warehouses and logistics – verifying goods-in and goods-out weights
- Agricultural operations – weighing livestock, feed, or harvested produce
- Workshops and packaging areas – requiring clear visibility and precision readings

## Key Advantages of the Micro T7E Indicator

- Extra-large 51 mm LED display for excellent readability
- Dual power operation – mains and rechargeable battery for uninterrupted use
- HI/LO alarm function helps monitor target weight thresholds
- Animal mode ensures stable readings for moving subjects
- Accumulation mode allows summing of multiple weights into one total
- RS-232 port for connectivity to printers
- Durable, compact design built for industrial environments
