

Micro A12 PW Scale

Measure More Than Just Numbers

The Micro A12 PW Digital Physician Scale is designed for precise weight and height measurement in professional settings. With a capacity of 300kg and a readability of 0.1kg, it ensures every measurement is accurate. Its integrated 2m height rod allows for seamless height tracking alongside weight, simplifying patient and client assessments.

Featuring a bright red LED display, the Micro A12 PW ensures readings are easy to see, even in dimly lit consultation rooms or busy gyms. The auto-zero function automatically resets the scale after each use, helping healthcare professionals save time and avoid errors during repeated measurements.

Designed with convenience in mind, the Micro A12 PW operates on both mains power and a built-in rechargeable battery, allowing placement anywhere in your facility. This dual power functionality ensures continuous operation, even during power interruptions.

The scale's platform measures 375 × 275mm, providing a compact footprint without compromising stability or durability. Its robust construction supports frequent daily use, while the integrated height rod eliminates the need for separate measuring devices, saving both space and time.

With Border Scales, the Micro A12 PW comes with service and calibration support to maintain long-term accuracy, it is the reliable choice for medical clinics, hospitals, gyms, dieticians, and wellness centres that require precision, durability, and ease of use.

Specifications

- Fully electronic digital scale
- Bright 20mm LED display
- Auto zero after weight removed
- Rechargeable battery / mains operated
- Battery life: 40 hours constant use
- Auto shut off to save battery life
- Hold function to maintain mass reading
- Height rod: 810 - 2100mm
- Platform size: 275 x 375mm
- Capacity: 300kg x 100g
