

## Micro KC Counting Indicator

The Micro KC Indicator is a compact, reliable weighing display designed for everyday weighing tasks. It features a clear digital screen, intuitive operation, and stable weight readings, making it ideal for basic scale setups. Durable and user-friendly, it delivers consistent performance across various applications.

- Inventory and stock-taking: Quickly count large quantities of identical parts (screws, bolts, washers, etc.) – far faster and more accurate than manual counting.
- Batch preparation & packaging: Prepare sets of parts to exact quantities and weight, useful for assembly lines and order fulfilment.
- Manufacturing and industrial supply: Maintain control over component counts and inventory in factories, workshops or warehouses.
- Flexible workflows: Battery-powered portability allows for temporary or mobile counting stations, useful in dynamic or large-scale storage environments.

### Specifications

- **Display:** Backlit LCD showing total weight, unit weight (average) and piece count
- **Power supply:** Built-in rechargeable battery + mains adapter (AC/DC)
- **Functions:** Tare, zero, accumulation (running total), piece counting, unit-weight averaging, pre-set weight/ piece alarms
- **Flexibility:** Supports multiple/analogue load-cell configurations (up to four load cells) & can connect to a variety of platform bases, for varied capacities.
