

# The Micro M301

## Scaling New Heights in Patient Care

The Micro M301 Medical & Physician Scale is designed for healthcare professionals who demand precision, reliability, and efficiency. Perfect for clinics, hospitals, gyms, dieticians, and wellness centres, this scale combines weight, height, and BMI measurement in one compact, easy-to-use device. Accurate readings ensure that patient monitoring and assessments are both consistent and trustworthy.

With a weight capacity of 250kg and readability of 0.1kg, the Micro M301 handles nearly all adult patients with precision. Its integrated 2m height rod, marked in 0.5cm increments, allows simultaneous height measurements. Combined with its BMI bar graph indicator, this scale provides a complete overview of a patient's health metrics quickly and efficiently.

The large 25mm LCD display with a white backlight makes readings clear and easy to see in any lighting environment. Its auto-zero function ensures that every measurement starts accurately, eliminating errors and saving time during busy clinical workflows. The intuitive interface is designed for both professionals and patients, creating a seamless weighing experience.

## Specifications

- **Maximum Capacity:** 250kg x 100g increments
- BMI display with bar graph
- 25mm LCD Display with white LED backlight
- **Indicator:** Rechargeable Battery/ AC Adaptor
- Height Rod up to 2100mm
