

Micro T7E Wheelchair Scale

Sit Back and Relax... We've Got This

The Micro T7E Wheelchair Scale is a professional-grade weighing solution designed specifically for patients who rely on wheelchairs.

Perfect for hospitals, clinics, frail-care homes, and rehabilitation centres, this scale ensures that patient weight measurements are accurate, safe, and dignified. Its design prioritizes ease of use, reducing stress for both patients and medical staff.

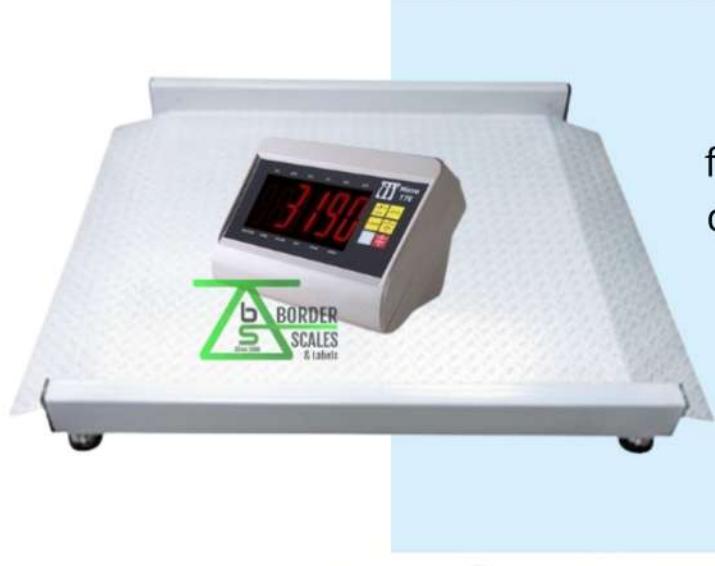

Equipped with dual-side access ramps, the Micro T7E allows patients to roll onto the platform effortlessly.

The non-slip powder-coated checker-plate surface ensures stability, while the pre-set tare function lets staff subtract the wheelchair weight for precise patient readings. This thoughtful design makes weighing mobility-impaired patients quick, safe, and hassle-free.

Accuracy is critical in medical care, and the Micro T7E delivers every time. With a high 600kg capacity and 0.2kg readability, the scale accommodates patients of all sizes, including bariatric individuals. Its bright red 50mm LED display guarantees clear readings even in dimly lit wards, while the hold function locks measurements in place if patients move slightly.

Built for the rigors of busy medical environments, the Micro T7E is constructed from rugged materials to withstand frequent daily use. It operates on both a rechargeable battery and mains power, offering flexibility for portable or fixed applications. Zeroing and tare functions further enhance ease of use, making it a practical solution for high-traffic facilities.

Specifications

- Maximum Capacity: 600kg x 200g increments
- 50mm LED Display
- Indicator: Rechargeable Battery/ AC Adaptor
- Adjustable levelling feet
- ABS plastic housing for easy cleaning
- Platform Size: 1000 x 1000mm
