

Coin Counting Scale Micro ZCC

The Micro ZCC Coin Counting Scale is designed to take the stress and guesswork out of coin handling. Whether you're managing a retail float, church collection, vending operation or daily cash-up, this scale gives you instant, reliable totals in just a few seconds.

With advanced weighing technology, the Micro ZCC accurately calculates both the number of coins and their total value. Simply place your batch on the platform, select the denomination, and let the scale do the rest — no sorting, no manual calculations, and no more time wasted.

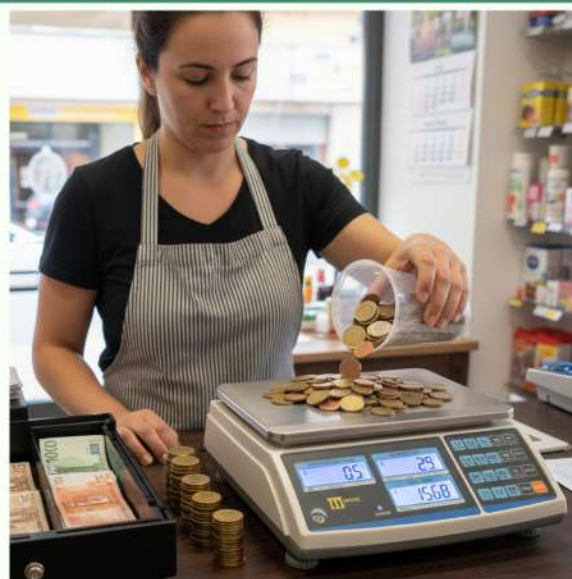

A bright backlit display ensures clear visibility in any environment, while dual power options — rechargeable battery or AC adapter — make the Micro ZCC suitable for both permanent counters and mobile operations. Its fast operation keeps queues short and cash-up smooth.

Specifications:

- LCD display with white back-light
- 3 Displays: Denomination, Quantity & Total value
- Power: Rechargeable battery / AC adapter supplied
- Password security lock to change coin / token value
- Optional: Printer
- Capacity: 30kg
- Readability: 1g
- Platter Size 263mm x 204mm

The scale also offers added flexibility with programmable coin and token values. This makes it ideal for businesses that use custom tokens, or environments where older and newer coin weights are mixed. Memory accumulation features help you total multiple batches without losing track.

Compact, durable and user-friendly, the Micro ZCC Coin Counting Scale is a smart investment for any business that handles high volumes of coins. It boosts efficiency, improves accuracy, and turns a tedious task into a quick, effortless process that saves time every day.
