

Linerless Labels

Linerless scale labels are adhesive-backed labels that do not require a backing liner¹.

This design offers several advantages for modern retail and food service environments in South Africa.

- Increased Capacity: Without the liner backing paper, more labels fit on a single roll—sometimes up to double the quantity of standard labels
- Reduced Downtime: More labels per roll means fewer roll changes, which helps high-volume businesses maximize efficiency
- Eco-Friendly: This option minimizes waste and lowers transport and disposal costs, supporting your business's sustainability goals
- Variable Lengths: When used with compatible scales (like the Ishida Uni-3L2 LL), the scale automatically cuts the label to the appropriate size, making it perfect for printing long ingredient lists or allergen information.

Whether you are running a butchery, a deli, or a general retail store, choosing linerless labels ensures your business can handle heavy labeling tasks while reducing your environmental footprint

Border Scales cc

Physical Address:

Cnr Courtenay & Keats Street,
 Cambridge, East London, 5247
