

# BORDER SCALES

WE'RE **WEIGH** BETTER

## Micro A12E Wall Mounted Fold Down Scale

The Fold-Down Carcass Scale is designed for professional use in butcheries, abattoirs, cold rooms, game-processing facilities, and meat distribution centres. Built for heavy-duty performance, the scale offers a 300 kg maximum capacity with a 100 g division, ensuring precise and accurate weighing for full carcasses, game animals, and boxed meat products. Its robust structure and digital accuracy make it reliable for daily industrial use.

Constructed with a stainless-steel fold-down platform, the scale allows operators to weigh boxed products, trays, or cut portions with ease. When the platform is lifted, it transitions into a hanging system equipped with four heavy-duty carcass hooks. This dual-function design maximises workspace efficiency, reduces equipment requirements, and provides seamless versatility for multiple weighing applications.

Hygiene and durability are essential in any meat-processing environment, and this scale meets those demands with its stainless-steel construction, splash-proof indicator housing, and smooth surfaces that are easy to wash and disinfect. The design supports food-safety compliance while ensuring long-term reliability, even under wet, cold, or high-pressure cleaning conditions.

## Fold-Down Carcass Scale – High-Performance Weighing for Meat Processing

To maintain uninterrupted workflow, the Fold-Down Carcass Scale operates on AC mains power as well as a built-in rechargeable battery, offering complete flexibility during load shedding or when working in remote areas of the plant. The digital indicator provides clear, stable weight readings, reducing errors and improving weighing speed and efficiency on the processing floor.

Engineered for real-world use, the scale performs exceptionally in receiving areas, cutting rooms, and inspection points. Its dual weighing modes (platform and hooks), 300 kg capacity, 100 g accuracy, and industrial-grade stainless-steel components make it a superior choice for any meat business requiring precision, hygiene, and durability. This scale is designed to improve operational control, reduce downtime, and deliver consistent weighing performance across all processing stages.

#### Full Specifications

- Scale Type: Fold-down carcass and platform scale
- Weighing Modes: Hanging carcass weighing (4 hooks) and platform weighing (stainless-steel fold-down tray)
- Maximum Capacity: 300 kg
- Accuracy / Division: 100 g
- Platform Material: Stainless-steel fold-down plate
- Hook System: 4 heavy-duty stainless-steel carcass hooks
- Frame Construction: Industrial-grade steel, hygienic and durable
- Indicator Type: Digital A12E-style indicator
- Display: High-visibility LED/LCD with stable reading
- Functions: Zero, Tare, Hold
- Indicator Housing: Splash-proof, suitable for cold-room and wet environments
- Power Source: AC mains supply
- Backup Power: Built-in rechargeable battery (60–80 hours runtime)
- Operating Environment: Wet areas, cold rooms, meat processing floors
- Temperature Range: -10°C to +40°C
- Cleaning: Easy-clean stainless-steel surfaces, water-resistant design
- Installation: Wall-mounted or frame-mounted depending on model
- Applications: Butcheries, abattoirs, game farms, receiving areas, meat processors

**Our Services**  
Border Scales is accredited by SANAS and NRCS to perform Legal Metrology Verification of scales used in trade within our scope of 3kg to 3000kg.  
Our trained and skilled technicians will service, calibrate and repair all equipment we sell. We offer in-house training on all new equipment installations.
